MESSAGE FOR TOWN OF WEST NEWBURY WATER CUSTOMERS

BRAKE HILL WATER TANK REPAIRS

The Brake Hill Water Tank is in need of some interior repairs while it is still under warrantee with the tank contractor. The water tank needs to be emptied during the rehabilitation period. In order to do the repair work, the water department needs to purchase water from the Town of Groveland. The repair work is estimated to take three weeks to complete.

On Friday February 17, 2023 the department plans to isolate the Brake Hill Water Tank and start purchasing water from the Town of Groveland during the rehabilitation period.

During that process you may experience periods of discolored water from time to time like you do when we flush hydrants semi-annually. Please check to see if the water is running clear before doing laundry.

The Water Department appreciates your cooperation during this period.

Thank you,
West Newbury Water Department, (978)363-1100 X127
